OUR COMMITMENT

The success of our projects is not only measurable through our clean indicators on safety, quality and delivery timing, but also consists in reaching environmental sustainability and carrying social responsibilities.

Managing Director

YOUR SATISFACTION

eis is envisioned to extend its business to foreign markets and international investors in egypt and provide optimal design and construction solutions in respect of the following commitments

100% SAFE HOURS
during execution

0% DEFECTS
at handover

100% ON TIME DELIVERY
following project schedule

BUSINESS VALUES

1 MISSION

Continuously providing sustainable MEP technical solutions and construction services with the fastest execution, while always ensuring safety and quality according to local and international standards with the goal of bringing peace of mind and satisfaction for clients. Reecons contributes to the improvement of production and business efficiency and ensures comfort, well-being, and safety for the end-users.

BUSINESS ETHICS Honesty - Dedication

2 VISION

To become the leading, reliable MEP contractor providing sustainable solutions from simple to complex design, installation and maintenance service in Egypt

3 CORE VALUES

PROACTIVENESS

Constantly preparing and proactively seeking the best solutions to any challenge. Continuous improvement empowers us to grow in order to exceed clients' satisfaction.

COOPERATION

Being open-minded and expressing ourselves clearly in communication, always listen and comprehend. Willing to exchange information, ideas, and assisting each other to grow.

COMMITMENT

Committing to fulfill our promises and accompanying clients and partners to the success.

INTEGRITY

Keeping honesty in communication and at work. Forbidding to conceal the truth or to do bribery and embezzlement in any manner.

SCOPE OF BUSINESS

Business Services

MEP EXPERTISE

Along 10 years of growth, **EEIS** provides complete installation, commissioning and maintenance services for mechanical, electrical, plumbing and firefighting systems of various projects across Egypt, implemented by our in-house engineering and construction resources. Customers and collaborators greatly appreciate our finishing quality, respect of schedules, on-site health and safety policies application, and investment & operation optimized engineering solutions.

DESIGN AND VALUE ENGINEERING

In different phases, from design concept to construction drawings, **EEIS** has become experts in providing design services by well-trained professionals, bringing innovative ideas, significant value engineering for cost reduction, quick processing of permits and reviews to contractors, partners, and owners in accordance to both local and international standards in the coordination of BIM Modelling.

MAINTENANCE

EEIS provides preventive and reparative maintenance by trained engineers to ensure the system's maximum continuous efficiency, in line with our dedication to high standards and expectancy.

DESIGN CONSULTANCY

DESIGN & BUILD APPROACH

Our experienced and well-trained engineers and project managers provide turnkey solutions with an efficient design & build approach.

Being a single point of responsibility allows us to conduct our projects without boundaries, communicate instantaneously, thus significantly reduce the time to complete the project, compared to the traditional approach.

EES designs include drawings, specifications, bills of quantity and calculations in accordance with local & international standards, requirements and visions of our clients.

Our philosophy for sustainability leads in the broad sense (financial & environmental) leads us to constantly challenge building technologies and processes.

BUILDING INFORMATION MODELING (BIM)

As part of our effort to grow with multi-disciplined services, **EES** has trained and empowered our Engineering Department to deliver design and value engineering through building information modeling (BIM).

Through 7 years of implementing BIM in our projects, we are able to detect, diagnose, and fix constructability problems before construction starts. This benefits the project timeline, possible maintenance & audit works and contributes to reducing construction costs for the investors.

We understand that each client has different requirements, so from the beginning, our solutions are customized to fit each project. From planning and design to construction and operation, our engineers provide assistance through the whole project life time.

VALUE ENGINEERING

1 OPTIMAL DESIGN

POWER SYSTEM ANALYSIS

Implementing the analysis of the power system allows to conduct a phase analysis of each component, track the voltage of different buses, the actual and reactive power flow between buses, plan the potential expansion of the current system and analyze the system under different conditions of failure and on the basis of different scenarios.

HEAT LOAD CALCULATION

With heat load measurement, we calculate many aspects in order to find the appropriate system capacity for optimal performance and comfort, and come up with a system that consumes less energy, achieves better results, and lowers monthly operating costs.

HYDRAULIC CALCULATION

Implementing the hydraulic calculation allows to determinate the need for hydraulic supply and the water pressure needed to sustain the necessary flow, leading to the correct size of pipes and equipment will be selected based on the analysis.

RELOCATION OF EQUIPMENT & ROUTING CONNECTION

Spotting the optimized location and routing connection, we ensure easier maintenance and reduce safety issues inducing a huge saving on the cost for piping, valves, ducts, etc., for investors.

MATERIALS & EQUIPMENT SELECTION

The selection of materials and equipment is made to find the environmental and energy-efficient materials with best practices in order to avoid oversizing and overdesigning based on the market and local conditions.

2 ENERGY SOLUTIONS

ENERGY EFFICIENCY

The selection of the main equipment considers energy efficiency relatively to the project's objectives, through the evaluation of respective coefficient of performance (COP) - but more importantly as a whole, as single facilities are related and impact on each others.

LIGHTING

Numerous control types are used to operate lighting system, including switches, occupancy and photosensors, and other automatic control systems to manage lighting along with other facilities, with the objective of improving energy savings, productivity and well-being of building users.

HVAC

Different solutions from using well-insulated pipes, ducts, and outlets to trap in all the heated or cooled air to and preserving airflow and choosing a right type of air conditioning system that could contribute greatly to the operation cost of a property.

POWER MONITORING SYSTEM

The power monitoring system provides the data required for important energy management such as capacity analysis of electrical panel, troubleshoot of circuit breaker trips, detection of energy costs and uncovered energy waste.

3 BRANDS & VENDORS

AFFORDABLE BRANDS WITH EQUIVALENT QUALITY

We offer methods of evaluating the entire engineering strategy based on market experience to find out whether there is a possibility of proposing a better brand name, a better price but still qualifying the same requirements.

VENDORS WITH GOOD SERVICES & FAST DELIVERY

With a physical inventory of the equipment & vendors on hand, we propose different options along with good after-sale guarantee and maintenance services, fast responding and close to the construction site to reduce the cost and time of delivery.

MEP CONSTRUCTION

WE PROVIDE

Complete engineering, design & build, full support for any size project from concept designs up to project completion and commissioning.

01 MECHANICAL

- HVAC System
- Central Chiller
- VRF system
- Split type system
- BMS / CMS

02 ELECTRICAL

- Medium and High Voltage
- Low and extra-low Voltage
- Main Feeder
- Lighting
- Generator
- Earthing & Lightning
- Data & Telephone
- CCTV & Security
- CATV / MATV

03 PLUMBING

- Plumbing
- Sanitary
- Sewage
- Water Treatment (STP, WWTP)

04 FIRE FIGHTING

- Fire Alarm
- Sprinkler Hosereel

- Foam Fire Fighting
- Gas suppression (FM 200, CO2, INERGEN)

05 PROCESS

- Gas piping
- Gas tank installation
- Process ventilation
- Process cooling water
- Utility piping (steam, compressed air)

06 MAINTENANCE

- Reecons offers 24/7 MEPF system comprehensive and preventive maintenance services

SPECIFIC MEP EXPERTISES

PROJECT CERTIFICATES

Project certification has been an important factor in determining project quality. To assist you in getting certification for your project, Reacons has gained the experience to appropriately apply all of the criteria while keeping the cost of execution in mind. Our engineers are constantly trained and certified in order to create designs with proper dimensions and specifications while providing easy and smooth authorization.

*Egyptian
Code Civil
Defence*

We handle every aspects of a project from design to construction, maintenance and upgrading systems with our historical background as a MEP expertise.

DESIGN AND CONSULTANCY

SUPPLY AND INSTALLATION

MAINTENANCE & WARRANTY

INDUSTRIAL PROCESS

EEIS has assembled processing systems and equipment for a diverse range of clients and industries. Our engineers are capable of dealing with both traditional and high-tech processes and provide reliable and cost-effective solutions for the various domains.

COLD STORAGE

To contribute to significant difference to your business, EEIS pays attention to design aspect and value engineering to perform design optimization, cost-saving solution and proper equipment & material selections, leading to a significant drop in energy use and monthly utility bills.

DATA CENTRE

EEIS, in cooperation with other project stakeholders, support to provide possibility of power & cooling demand optimization, sustainable alternatives, in accordance with NFPA, UL/FM, Uptime Institute's Tier Standard in both design and operating standards.

CLEAN ROOM

To prevent particulate contamination and control other environmental parameters EEIS develops comprehensive approach to clean room technology that is tailored to your facility's needs to ensure the environment is properly managed, monitored, and stored.

MAINTENANCE

OUR GUARANTEE AFTER CONSTRUCTION

In addition to our internal effort for quality and 0% defect commitment, we provide a guarantee of free maintenance up to 2 years after completion of all our projects.

Our dedicated maintenance team excels on both preventive and reparative maintenance and keeps on continuous training on the evolution of technology.

Among the defects cover by our maintenance services, the most common and critical ones are

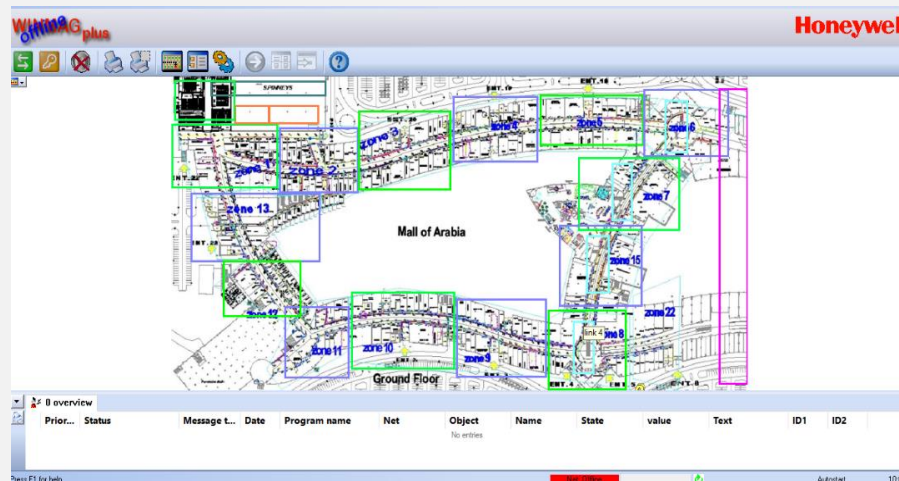

A THOROUGH PREVENTIVE MAINTENANCE ALLOWS TO ANTICIPATE THE RISK OF DISRUPTION THAT COULD AFFECT THE OPERATION AND RESULT IN HIGH REPARATIVE MAINTENANCE COSTS

PROFESSIONAL MAINTENANCE SERVICE

EEIS provide the professional maintenance service to help you inspect and evaluate your project to determine risks, maintenance plans, necessary remediations, etc. The maintenance works are performed by a dedicated maintenance team specialized in various disciplines.

With a long-term maintenance contract, we guarantee peace of mind to our clients and partners by keeping your project functional and livable.

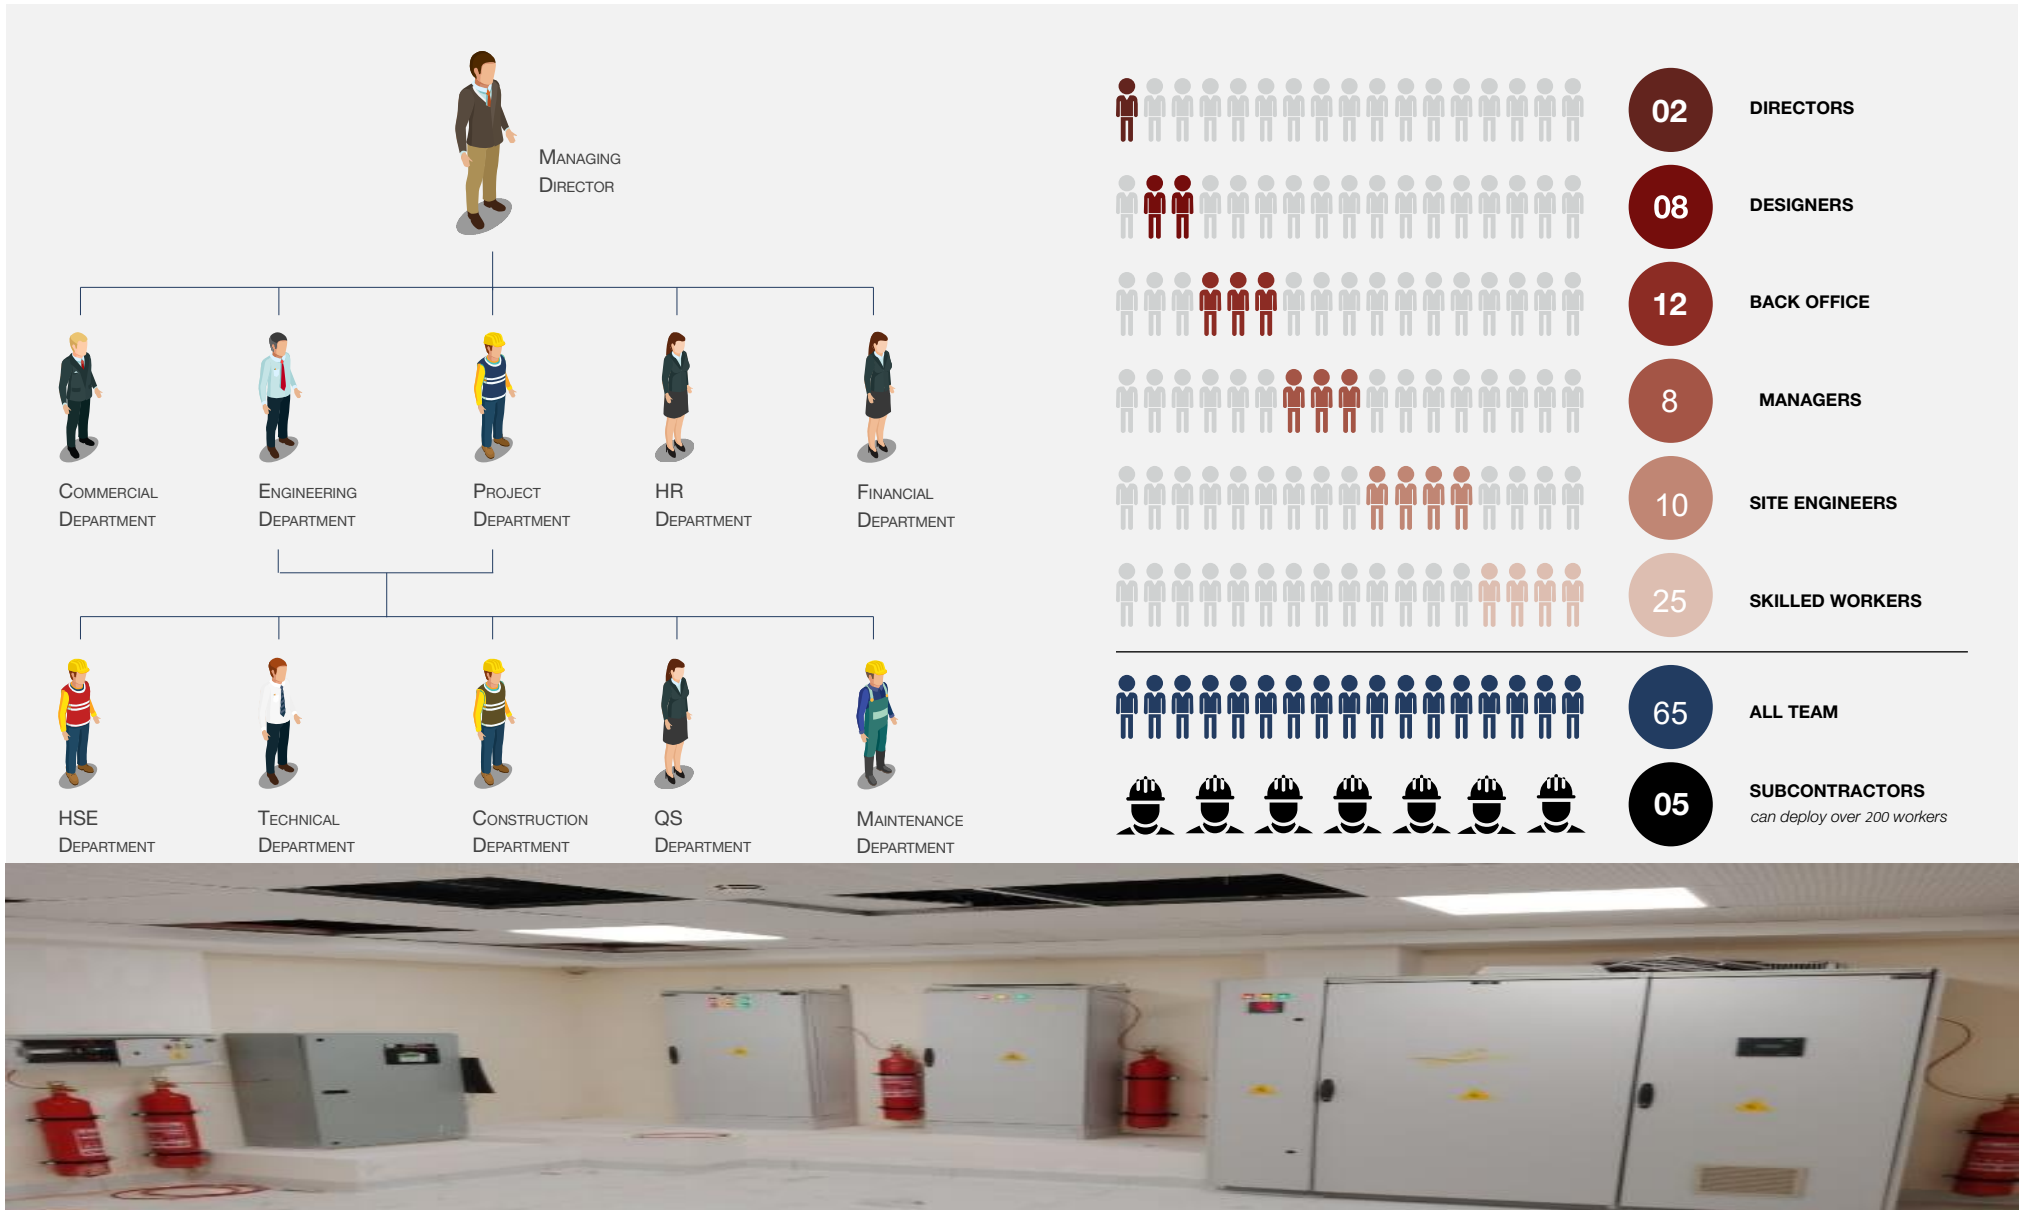

ORGANIZATION & RESPONSIBILITY

ORGANIZATION CHART

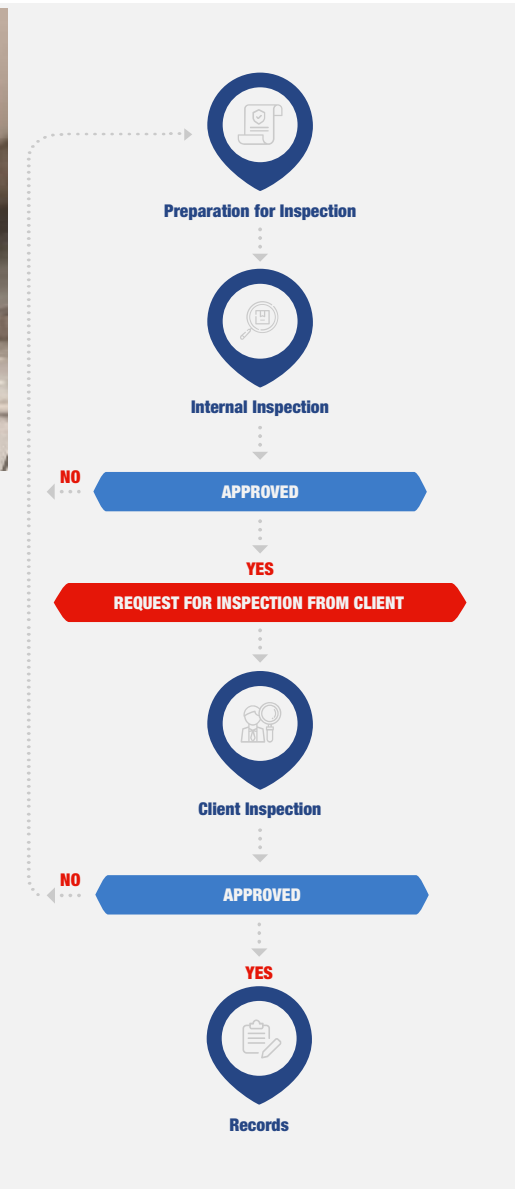

QUALITY MANAGEMENT

QUALITY MANAGEMENT SYSTEM

Quality is important to our business because we value our customers. We aim to provide services for our clients that meet and even exceed their expectations.

We are dedicated to continuous improvement and have set up a quality management system that offers a framework for our output to be evaluated and enhanced by regular gathering and monitoring from customer feedback, training and growth our employees, periodic audits of our internal processes, measuring quality goals that reflect our business objectives, reviewing audit results, customer reviews and complaints by the top management.

SAFETY MANAGEMENT

POLICY

HSE Policy is signed by our Managing Director and committed by Top Management throughout the implementation of the construction process to ensure a safe and healthful workplace for all our employees. With the mission of focusing on employees occupational health and safety and commit to protecting the environment, officially announces our HSE policy as the following

1. To comply with legal requirements and any other requirements that relevant to occupational health and safety as well as environmental aspects.
2. To ensure occupational health and safety for employees and prevent occupational diseases that affect employees' health in the working process.
3. To protect the environment and the safety of the local community.
4. To promote awareness, participation, and consultancy of employees for HSE issues.
5. To provide an adequate resource to ensure operational performances along with all requirements and to maintain and continually improve the HSE management system in accordance with the standards.

HSE MANAGEMENT SYSTEM

HSE Management System (HSEMS) complies and refers to the quality management process to incorporate into the HSE management approach. Utilizing this process allows the project to maintain a continual improvement cycle. These improvements are expected to be realized by the reduction of onsite risks in a systematic manner.

PERFORMANCE

BUSINESS REPORT

ANNUAL REVENUE

Good progress has been made in the last 5 years, with key operating and financial metrics improved significantly. We proudly delivered good business results in profitability and annual revenue through our great efforts in:

Actively managing our profile: we sharpened Reecons' strategic focus on safety, schedule, and efficiency of projects.

Accelerating innovation: sciences and technologies are fundamental to empower us in anticipating changes of construction trends.

Taking leadership role in sustainability: we accelerated actions to make substantial progress in our projects when suitable technically and financially.

PROJECT SIGNED

The number of projects signed over the last 5 years has steadily increased. Reecons has earned the confidence of many customers and partners by maintaining a solid technical record, good reputation and continuous improvement, improving our position on the market to successfully win various types of projects.

We envision to increase our presence in the real estate sectors including commercial, hospitality and residential while reserving experience in the industrial market.
